

Stevens Health Alliance

WE PROVIDE A SAFE OFFICE ENVIRONMENT

- We traditionally take measures to protect our patients and the hygienic environment in which we provide services.
- Patients and those non patients who attend are clear of any pending or recent illness or signs thereof.,
- Following an appointment, we sanitize our office utilizing our vigilant sterilization techniques.
 - o Wiping down all surfaces the patient may have contacted
 - o pens and pencils, door handles, countertops etc.
- Our TMJ/Sleep-Breathing focus requires only occasional “drilling” procedures that create contaminating aerosols.
- For procedures that might contaminate our air quality we use a heavy-duty external vacuum that removes those aerosols during the procedure.
- Every patient must pass our infection control questionnaire. Patients with positive responses rescheduled according to our safety protocols.
- Patients: please utilize recommended hygiene in our office and at home. Effectively Cover your mouth with a cloth or paper towel if coughing and wash your hands following.
- Personally, we, ourselves, are restrictive in our contacts and travels, using optimum sanitation practices outside and inside the home and office.

I have read the aforementioned and agree that all precautions have been applied in accordance with the proclamation of the Stevens Health Alliance to protect my safety and of those who may enter after me.

Name_____ Signed_____

We appreciate the tolerance of the situation and applaud all efforts toward maintaining a healthy environment.

Please don't hesitate to call her office if you have any questions or concerns.

Be well & Promote Good Health,

James E. Stevens
